concept statement

The hit song of Nirvana is "Smells like teen spirit." "Teen spirit" is the theme of their hit song and represents well Nirvana at the same time. Nirvana and teenagers have something in common. They are not polished but pure and people could not know their inside. I think these aspects are similar to water. As you know when looking at the water, it is very simplified and beautiful but when you put some materials into the water, it views differently and distorted. I want to show my design by using these aspects. So I design the outside of my exhibition to look very simple, but looking it inside, it is quite complicated.
